

## How to use the chart

1. When printing the size chart make sure that it is printed in the correct scale. To check this go to page scaling on your printer options and select none.
2. Match the size of the credit/debit card to the graphic at the bottom of the chart.
3. Cut chart at dotted line. Place chart against a wall. Place child's foot at the bottom of the chart, lining up the heel with the "place heel here" area. Child must be standing for accurate results.
4. Measure both the right and left foot for accuracy. Note: when ordering use the largest of the two dimensions.
